Flawed investment and trading strategies

Poor time management

High learning cost

REASONS

WHY Losses In The Trading Market

Retail Investor

1

Learning Cost

Forex market requires time and energy to understand, and early-stage losses can happen.

2

Time Cost

Master and learn the forex market, one needs time and effort.

3

Mental Stress

Emotions may affect trading decisions, resulting in irrational actions.

4

Lack of Resources

May lack sufficient research resources or tools for comprehensive analysis.

5

Higher Risk

Inexperienced traders may face higher risks and potential losses.

Analysis of Key Factors in

Custody

1

Expertise

Professional traders possess extensive market experience and analytical skills, enabling them to develop more effective trading strategies.

2

Time Efficiency

Investors don't need to spend a lot of time on market analysis and can manage their investments more easily.

3

Minimal Mental pressure

Professionals take care of the trading, allowing investors to minimize the psychological strain caused by market fluctuations.

4

Investment Diversification

Professional institutions typically use a variety of strategies and asset allocations to reduce trading risks.

5

Stability

Professional custodians implement risk management measures to ensure the safety of investors' funds.

6

Market Evaluation

Professionals can provide market trend analysis and investment advice, helping investors gain better market insights.

Analysis of Key Factors in Trading

If you were to go back ten years, could you profit from trading?

Suppose we adopt an all-knowing perspective first, and then choose: long or short?

After gaining
an omniscient
perspective

Long Or
Short?

Hypothetically Long

Scenario 1

1

In August 2013, bought a long position of one standard lot of gold spot contracts and held it until October 2023, with the price rising from \$1300 to \$2000.

2

Profit from a long position of 1 lot =
 $(2000 - 1300) \times$
 $\$100 = \$70,000$
(trade profit/loss).

3

Actual profit situation=
 $\$70,000 - (\$30 \text{ per day inventory cost} \times 360 \text{ days} \times 10 \text{ years} = \$108,000)$
= **-\$38,000** (actual gain/loss).

Hypothetically Short

Scenario 2

1

In August 2013, sold a short position of one standard lot of gold spot contracts and held it until October 2023, with the price rising from \$1300 to \$2000.

2

Loss from a short position of 1 lot =
 $(2000 - 1300) \times \$100 = \$70,000$
(trade profit/loss).

3

Actual profit situation =
(Earn \$20 per day) (short position carrying cost) \times
360 days \times 10 years =
\$72,000) - \$70,000
(account profit/loss) =
\$2,000 (real profit/loss).

The whole world
knows that gold
is **Bullish** in the long term .

So, the rule-makers at the top have already
set up pre-determined profit barriers for
ordinary people.

That is, the daily carrying cost for
holding a long position in gold.

ZhongfaZhixunTechnology Development Co., Ltd. has partnered with RC Investment, a subsidiary of RongnaGlobal Markets, to jointly develop the ANAVA project on Koh Samui Island, Thailand. The project will feature high-end seafront villas, resort apartments, and luxury hotels, which have become increasingly popular among high-net-worth buyers. Thailand's relaxed property policies provide convenient investment opportunities for overseas investors, making Koh Samui an ideal destination for real estate investment. Founded in 1993 and headquartered in Zhongguancun, Beijing, ZhongfaZhixun Technology Development Co., Ltd. (the parent company of the ZhongfaGroup) has evolved over more than 20 years into an international conglomerate with a presence in six key industries: cultural tourism real estate, smart manufacturing, international tourism, commercial ventures, supply chain finance, and cultural media. With nearly 1,000 employees and net assets exceeding 10 billion RMB, ZhongfaZhixun has established a strong market position. Over the next five years, ZhongfaZhixun plans to drive growth through a dual strategy: the "Cultural Tourism Industry" and "Smart Manufacturing Ecosystem." By providing premium services to end consumers through the cultural tourism industry and offering transformation and upgrade support to businesses via the smart manufacturing ecosystem, ZhongfaZhixun aims to become a trusted, global, large-scale industrial group.

This collaboration not only strengthens the endorsement of RongnaGlobal Markets as a group, but also provides enhanced support for investors to better participate in the financial products offered under RongnaGlobal Markets.

RC-Global

RC-Global

With the world's most robust trading strategies, emp
the surge in digital asset value.

RC Global is a professional financial trading firm specializing in providing efficient and expert spot and futures gold trading services. Our team of traders brings years of market experience and technical expertise, dedicated to offering clients the best trading strategies and advice to help them achieve higher investment returns with minimal risk. We have developed our unique Hongmeng Bilateral Trading Strategy, utilizing a combination of techniques and tools including technical analysis, fundamental analysis, and volatility trading to maximize our clients' investment returns. Risk control is a core priority for us, and we implement scientific risk management strategies and stop-loss rules to ensure the safety and stability of client investments.

Our trading team monitors market dynamics in real time every day, analyzes market trends, and develops trading strategies to provide clients with more investment opportunities. At RCG, we are committed to professionalism, efficiency, and security, delivering the highest quality gold options and futures trading services to our clients.

Harmony Bilateral Trading Arbitrage

Trading Principles

Profit

The company profits from interest rate arbitrage, while investors earn returns on their own accounts.

Loss

The company provides interest insurance for margin replenishment, ensuring that clients avoid losses.

Interest arbitrage profit calculation formula

Standard lot (23 USD/day × holding days - both-way transaction fees - (London gold short position loss greater than New York gold long position profit, or London gold short position loss less than New York gold long position profit) ± 10 USD price fluctuation)

Scenario: **PROFIT**

1000USD

**The stop-loss
is set at 1% of
the position
size = 10 USD.
The expected profit
point is 8% = 80 USD.**

PROFIT

**Investor profit:
80 USD.**

Interest arbitrage profit calculation formula

Standard lot (23 USD/day × holding days - both-way transaction fees - (London gold short position loss greater than New York gold long position profit, or London gold short position loss less than New York gold long position profit) ± 10 USD price fluctuation)

Scenario: **Loss**

1000USD

**Trading loss: 10
USD.**

Hit stop-loss

Loss

The company replenishes the margin at 12:00 PM the following day. Example: The company holds 1 lot overnight with an interest of 23 USD. The company covers the loss amount, resulting in a final profit of 13 USD, ensuring the investor incurs no loss.

Interest arbitrage profit calculation formula

Standard lot (23 USD/day × holding days - both-way transaction fees - (London gold short position loss greater than New York gold long position profit, or London gold short position loss less than New York gold long position profit) ± 10 USD price fluctuation)

Live Analysis Room

Transparency is the cornerstone of healthy operations. By providing live access to the analysis room, companies allow investors to clearly see the processes and rationale behind their analyses. This transparency helps reduce information asymmetry, thereby enhancing market fairness.

Moreover, live transparency can effectively build and maintain trust. In the financial sector, trust is the cornerstone of the relationship between clients and companies. By openly demonstrating the analysis process, a company not only showcases its professionalism but also proves to the public that its decisions are based on rigorous research and sound data, thereby earning trust.

In conclusion, providing live access to the financial analysis room is not only a demonstration of accountability to external stakeholders, but also an important means of enhancing the company's professional image, improving market efficiency, and promoting financial education.

Information Security Management System (ISMS) Certification

ISO 27001 Information Security Management System (ISMS) Certification, established by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). ISO 27001 has undergone several revisions, including ISO 27001:2013.

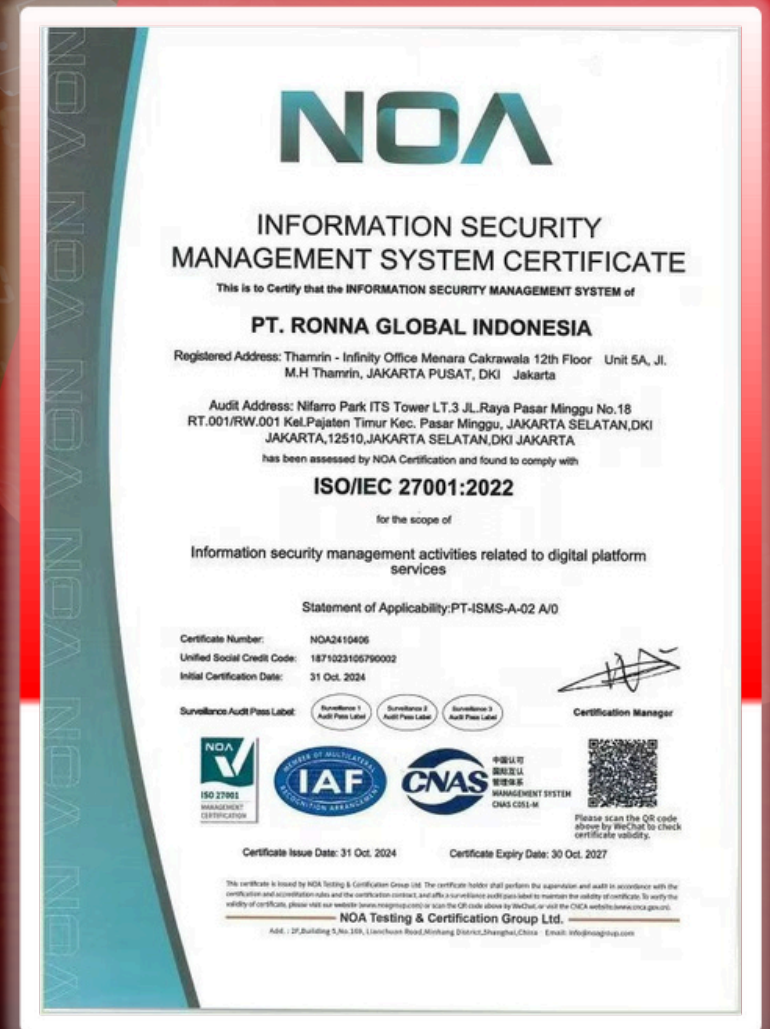

Latest version: ISO/IEC 27001:2022.

It encompasses strategies and steps to protect sensitive data of the organization, including intellectual property, ensuring the effectiveness of information security controls and safeguarding the overall information security of the organization.

The ISO 27001 standard mandates that organizations implement a robust management system that includes technical, operational, and security controls to protect sensitive information.
